

How Do I Log In to My Crypto.com Account

Sign-In Steps & Common Fixes

Getting Started

Logging in to your Crypto.com account is generally straightforward. You can access your account through the Crypto.com App or the appropriate official web platform, depending on the service you're using. You'll typically need your registered email or account credentials and any required authentication method.

Login Process

1. Open the Official Crypto.com Platform

Launch the Crypto.com App on your mobile device or navigate to the official Crypto.com website. Avoid using login links received through unexpected emails, texts, or social media messages.

2. Enter Your Registered Email

Use the email address associated with your Crypto.com account. Make sure there are no typing errors or unwanted spaces.

3. Enter Your Password

Type your account password carefully. If you don't remember it, use the available password-recovery option rather than repeatedly entering incorrect passwords.

4. Complete Security Verification

Depending on your account settings and device, you may be asked for a verification code, passkey, biometric confirmation, or another security check.

5. Confirm Account Access

Once authentication is successfully completed, you should be taken to your account dashboard where you can view your available services and account information.
